Middle School Field Trip to the Great Lakes Science Center

As a result of being a 21st Century participant and participant our 2nd annual Science Fair this past January, our Middle School students earned a trip to the Great Lakes Science Center. The first thing I need to say about our trip is just WOW!!! **Ms. Monske** and I, as well as our parent chaperones, were all VERY proud of our students. We received compliments from not only the staff at the GLSC, but from other visiting teachers, parents and chaperones. We had the BEST time on our trip! We not only saw the regular exhibits at the GLSC, but we were able to view the traveling hands-on exhibit *H2O; Water=Life* and watch the OMNIMAX film *Sea Monsters*, which was about prehistoric sea creatures. The students couldn't stop talking about the film as it was, for most of them, the first OMNIMAX theatre experience they had ever had. Ms. Monske and I can't wait to start planning for our next trip! (see attached photos) (submitted by **Heidi Brown**)
