

## VSH Great Happenings

### SEPTEMBER 11, 2009

- High school World History classes have been learning about prehistory and as an extension to cave drawing, students created their own drawing based on things that surround their lives. They pretended that in our world now, what kind of drawing archeologists might find in the future to understand our culture today. (submitted by **Jenna Salupo**)
- The 5<sup>th</sup> & 6<sup>th</sup> graders are learning the added responsibilities that come with starting Middle School. They have done some writing about their dreams and favorite seasons. They have also been studying about owls and being a good citizen. As they venture forward, we are hoping for improved reading and math so they can be even more successful in life. (submitted by **Meg Oeder**)
- I would like to take time out to congratulate **Harriet Bloch** for finishing the K-3 Dibels testing! We are excited to be starting our Reading Groups on Monday. My math group is having fun with numbers. We played Number bingo and Number word bingo with one to ten. We are learning to order numbers from 0 to 10 and we made number caterpillars and hung number shirts out to dry. (submitted by **Lori Raskin**)
- In-home is booming, we are getting in home new students daily. Thank you **Enrollment** for all your hard work. (submitted by **Marsida Satka**)
- The first graders talked about 9-11 and all of the heroes that helped so many people. The students then wrote about their heroes, and made an American flag with glitter stars! (submitted by **Jill Leyser**)
- **Mrs. Alice Nack**'s resource room has been working on many projects. Students have been taking Career Interest Surveys to help them determine what their interests are and what jobs would match their strengths and interests. The students are working on a job planner which goes over the skills needed for employability.
