Great Happenings

- On Tuesday, October 13 (5:00 – 7:00pm), there was an Open House at Tri-C about various careers in the medical profession. And on Wednesday, October 14, Bryant and Stratton came to our school to speak to our seniors about applying to college, financial information about college and grant and scholarship information. (submitted by **Pam Epler-Brooks**)
- **Mrs. Oeder's** class took time out from their study of the United States to read with the 1st graders today. The class has been working very hard on where they are in the United States... next we'll move on to the capitals of the states and the countries of the world!! (submitted by **Meg Oeder**)
- We have been working so hard in Math Class. One group has been working on subtraction facts from 10 or less. Another group is working on reading, writing, and putting in order numbers from 0-5. The whole class played an Ordinal number line game involving standing up, sitting down and hopping on one foot. We concluded our week with a worksheet where the students had to find objects in a picture of a math class. (submitted by **Lori Raskin**)
